

EDUCATION

Indiana University Bloomington

GPA: 3.6/4.0

Major: Informatics

Cognate: Media

Minor: Computer Science & Video Game Design

Status: Fourth-year student, Direct Admission to Luddy School of Informatics, Computing, and Engineering

Related Courses: CSCI-C 343 Data Structures, CSCI-B 365 Data Analysis and Mining, INFO-I 308 Information Representation, INFO-I 453 Computer and Information Ethics

May 2026
Bloomington, Indiana

INDEPENDENT STUDIES

LGBTQIA+ Privacy Concerns:

September 2022 - December 2022

- Investigated bias in AI systems, social media platforms, and third-party software in the handling of sensitive demographic data.
- Co-authored a case study on the digital privacy risks faced by LGBTQIA+ individuals and women online; managed and analyzed all collected data using Microsoft Excel.
- Facilitated a research conference for 10+ attendees, presenting data-driven findings to stakeholders and fellow researchers using data analytics frameworks to communicate trends in platform safety.

SKILLS

Technical Skills: Excel, PowerBI, Snowflake, Figma, Adobe, Git, GitHub, Word, Powerpoint, $\text{\LaTeX}$

Programming: SQL, MySQL, Python, Java, JavaScript, HTML/CSS, UnrealEngine Blueprints, and C#

Hardware: Independent work to build basic computers.

Linguistic: 5+ years of experience learning Spanish

WORK EXPERIENCE

Game Design Intern

August 2025 - May 2026

Indiana University
Bloomington, Indiana

- Collaborate with two fellow interns to conceptualize and execute education events focused on game design principles for women and underrepresented groups, reaching 15+ attendees every event.
- Synthesize industry knowledge to develop workshop curricula covering the full game design pipeline, from concept to prototyping.
- Coordinate logistics, outreach, and post-event feedback collection to continuously improve event impact and participation.

UI/UX Intern

May 2025 - August 2025

Invoke Learning
Brownsburg, Indiana

- Audited and proposed redesigns for the company website and internal software tools, applying UX research principles to better serve a higher education data analytics audience.
- Authored technical documentation for 5+ database sources and API connectors, reducing onboarding friction for new team members.
- Produced a comprehensive user guide for the California Community Colleges student data analytics platform, improving accessibility for non-technical end users.

Technical Animator & Game Developer

January 2024 - August 2024

Nocturnus Media, LLC.
Bloomington, Indiana

- Designed and animated 2D sprites using Aseprite and Unity Engine.
- Took ownership of UI element design across projects, translating gameplay requirements into clear, polished in-game interfaces.
- Partnered with animators and developers in an agile team environment to deliver production-ready assets on schedule.

Code Instructor

May 2023 - August 2023

Code Ninjas
Carmel, Indiana

- Taught programming fundamentals to 30+ children aged 4-15 using Unity, MakeCode, and Scratch, adapting instruction style to a wide range of skill levels and ages.
- Spearheaded Boot Camp sessions introducing core computer science concepts.
- Upheld a sage, inclusive, and encouraging classroom culture, receiving positive feedback from parents and students.
